(57) **CLAIM**

The ornamental design for a bicycle frame element configured to receive an accumulator, as shown and described.

DESCRIPTION

Cross reference is made to copending U.S. design patent application Ser. No. 29/526,095 entitled “Bicycle Frame

Element with a Mounted Accumulator” by Greiner, which was filed on May 6, 2015; U.S. design patent application Ser. No. 29/526,100 entitled “Accumulator” by Greiner, which was filed on May 6, 2015; U.S. design patent application Ser. No. 29/526,101 entitled “Bicycle Frame Element Configured to Receive an Accumulator” by Greiner, which was filed on May 6, 2015; U.S. design patent application Ser. No. 29/526,103 entitled “Bicycle Frame Element Configured to Receive an Accumulator” by Greiner, which was filed on May 6, 2015; U.S. design patent application Ser. No. 29/526,106 entitled “Bicycle Frame Element Configured to Receive an Accumulator” by Greiner, which was filed on May 6, 2015; U.S. design patent application Ser. No. 29/526,112 entitled “Bicycle Frame Element Configured to Receive an Accumulator” by Greiner, which was filed on May 6, 2015; U.S. design patent application Ser. No. 29/526,115 entitled “Bicycle Frame Element Configured to Receive an Accumulator” by Greiner, which was filed on May 6, 2015; U.S. design patent application Ser. No. 29/526,119 entitled “Bicycle Frame Element Configured to Receive an Accumulator” by Greiner, which was filed on May 6, 2015; and U.S. design patent application Ser. No. 29/526,126 entitled “Bicycle Frame Element Configured to Receive an Accumulator” by Greiner, which was filed on May 6, 2015.

FIG. 1 is a perspective view of a bicycle frame element configured to receive an accumulator showing my new design;

FIG. 2 is a right side elevational view showing the design for the bicycle frame element configured to receive an accumulator of FIG. 1;

FIG. 3 is a left side elevational view showing the design for the bicycle frame element configured to receive an accumulator of FIG. 1;

FIG. 4 is a front elevational view showing the design for the bicycle frame element configured to receive an accumulator of FIG. 1;

FIG. 5 is a rear elevational view showing the design for the bicycle frame element configured to receive an accumulator of FIG. 1;

FIG. 6 is a top plan view showing the design for the bicycle frame element configured to receive an accumulator of FIG. 1; and,

(Continued)

FIG. 7 is a bottom plan view showing the design for the bicycle frame element configured to receive an accumulator of FIG. 1.

The broken lines shown in the drawings illustrate portions of the bicycle frame element configured to receive an accumulator that form no part of the claimed design. The dash dot lines shown in FIGS. 1-3, 6, and 7 identify boundaries of the claimed design and form no part of the claimed design.

1 Claim, 7 Drawing Sheets
